

Workshop goals:

The need for basic knowledge in drug science is greater than ever. Cooperation between Academy and Pharmaceutical Industry is of utmost importance and can contribute to significant innovation at all stages of drug development process.

The workshop will focus on pharmaceutical innovation with speakers coming from both the pharmaceutical industry and academy. All topics will deal with technology, process, formulation, and equipment innovations.

Confirmed Lectures:

Mathematical modelization of a lyophilization cycle
Continuous manufacturing
Robotics in process automation
Innovation in solid-state characterization
Oral Protein/Peptide Delivery
Innovation in wound healing

Oral presentations

Oral presentations (20 minutes) will be considered for abstracts dealing with high impact research projects in advanced phase and presented by expert researchers.

Posters

A poster session is scheduled. A graphical abstract for all the poster will be also projected on the main screen during all the workshop

Organizing Committee

Piero Iamartino
Marco Adami
Andrea Gazzaniga
Paola Minghetti

Thematic workshop of Controlled Release Society Italy Chapter

Pharmaceutical Innovations: Academy Meeting Industry

**Topics: formulation and
technological aspects,
Manufacturing,
implants**

**Milan, November 3rd – 4th
2016**

University of Milan, Sala Napoleonica,
Via S. Antonio 10 Milan (Italy)
